

Unique and innovative solution to stop hair loss and strengthen new and existing hair. Enhances the results of the medical treatment thanks to its combination of ingredients such as *Sabal serrulata* and Aminexil.

Anti-hair loss lotion is a treatment especially formulated to stop hair loss. Indicated for all types of alopecia and for the daily care of fine, fragile and delicate hair. Anti-hair loss lotion strengthens and revitalises the hair follicle by stimulating the growth phase, increasing density and improving the hair structure.

This lotion provides an intensive action without leaving any residues on the hair and scalp, as well as enhancing the results of medical hair loss treatments at home.

CONTENTS

- 100 ml spray

INDICATIONS

- Male and female-pattern androgenic alopecia
- Traumatic alopecia
- Alopecia areata
- Diffuse alopecia

METHOD OF USE

- Apply the product once a day for at least 3 months of treatment.
- Massage over the scalp and leave to dry naturally. May be applied directly as an intensive daily treatment, or as a preventive treatment every other day.
- Avoid contact with eyes, mouth and other mucous membranes.

ACTIVE INGREDIENTS

Aminexil

- Compound similar to Minoxidil that prevents premature ageing and improves the collagen structure.
- Improving the hair follicle's collagen structure increases blood flow to the follicle, resulting in stronger, more vigorous hair growth.
- Provides a vasodilator effect while prolonging the anagen phase.

Sabal serrulata

- *Sabal serrulata* is a plant that produces berries rich in fatty acids, phytosterols and flavonoids, from which the extract is obtained.
- Inhibits the action of the 2 isoenzymes of 5- α -reductase, reducing the amount of dihydrotestosterone and thus increasing the duration of the hair cycle by slowing it down.
- Capable of activating oestrogen receptors, maintaining the anagen phase and normalising the catagen phase.

Nicotinamide (B₃)

- Nicotinamide provides nutrients for hair growth and is a sebum-regulating ingredient.

Pyridoxine (B₆)

- Deficiency of this vitamin causes hair loss. Prevents hair loss and promotes hair growth. Also helps to eliminate dandruff or seborrhoeic dermatitis.

Tocopherol

- Vitamin that acts as an antioxidant in cell membranes.

Zinc

- Zinc is an enzyme activator of several metabolic reactions, including many linked to the wellbeing of the hair, hair follicles and scalp.
- Restores hair health and promotes hair growth.

Biotin (B₇)

- Promotes healthy hair growth and prevents the hair from becoming dry.
- Plays an essential role in keratin production.
- Increases hair elasticity.
- Prevents and minimises hair breakage and helps to strengthen and thicken the hair.

APPLICATION PROTOCOL

| Product | Treatment | Maintenance |
|-----------------------|----------------------------------|----------------------------------|
| Anti-hair loss lotion | 1 daily application each evening | 1 daily application each evening |
